

NEWLIFE FERTILITY
PATIENT MEDICATION INFORMATION

Repronex

Generic Name: Menotropins Intramuscular or Subcutaneous Injection (MEN-oh-troh-pinz)

Brand Name: Repronex

Repronex is used for:

Treating infertility in women. Repronex is generally used as part of an Assisted Reproduction Technology (ART) program. It may also be used to treat certain conditions as determined by **your doctor**.

Repronex is combination of hormones. It works by stimulating the ovaries to produce eggs. Human chorionic gonadotropin (hCG) is then given to cause ovulation (release of an egg). It also stimulates sperm production in men with certain types of infertility.

Before using Repronex

Some MEDICINES MAY INTERACT with Repronex . However, no specific interactions with Repronex are known at this time. Tell your health care provider if you are taking any other medicines.

Ask your health care provider if Repronex may interact with other medicines that you take. Check with your health care provider before you start, stop, or change the dose of any medicine.
